

# BioSquare Parking Garage Project Boston, MA

Owner: Boston University Medical Center  
General Contractor: William A. Berry & Son, Inc.

## Drilled Shafts

Elements: 57  
Diameter: 3-5 ft  
Max. Depth: 162 ft

## Summary

This structural steel and masonry parking garage was constructed by Berry for Boston University Medical Center as part of a 350,000 square foot expansion plan. The structure provides 1,100 parking stalls and 5,000 square feet of mixed use commercial space. TREVIICOS performed the drilled shafts under polymer slurry.
